IMonitor Power Keylogger (formerly Power Keylogger For Home) For Windows

IMonitor Power Keylogger is a monitoring software application able to record information about pressed keys, clipboard data, program usage, visited websites, and chat conversation. In addition, it helps you take screenshots and generate all sorts of reports. Web-based tool The program can be controlled via your web browser (e.g. Chrome, Opera, Firefox). You need to create an account before gaining access to the remote console. The login password can be changed anytime. You may add multiple devices that you want to monitor, namely Windows, Mac, or Android ones. All you need to do is to install the agent on the target device and gather statistics about it via your web browser. Get summary info about your PC IMonitor Power Keylogger reveals summaries about the monitored computer. You can check out info about the start time, total runtime, idle time, number of visited webpages, time spend chatting, printing jobs, and other details. Summaries can also be generated for top applications and websites used for a specific time period, as well as network traffic. System monitoring options The application records keystrokes and lets you filter the information by Office documents, web browsers, social sites, email clients, or chat utilities. Plus, you get to view the clipboard content, images, application usage, keyword logs, system events, and alerts. Internet/file monitoring capabilities and reports You can capture all accessed websites, URLs, HTTP file downloads, and search keywords, check out all text chat conversations, view info about received and sent emails, and analyze screenshots with Facebook and Twitter. Reports can be generated based on different criteria, such as programs, website history, user keystrokes, clipboard history, print jobs, USB device usage, FTP uploading mode, chat history, system events, and emails. Configuration settings You can disable removable storage devices, make automatic backups to your account, automatically take screenshots at a user-defined time in seconds, block specific websites for a custom time period, disable custom programs on specific days of the week, and take snapshots when specific keywords are detected. A powerful monitoring utility All in all, IMonitor Power Keylogger comes packed with advanced features for helping you keep an eye on pretty much everything that takes place on another user's computer. Description: IMonitor Power Keylogger is a monitoring software application able to record information about pressed keys, clipboard data, program usage, visited websites,

What's New in the IMonitor Power Keylogger (formerly Power Keylogger For Home)?

IMonitor Power Keylogger (formerly Power Keylogger For Home) IMonitor Power Keylogger is

a powerful monitoring software that lets you secretly get notifications about the computer activities and the connections of the users. Whether it is your family members or your employees, you have to worry about their activities that are not right because of the cheating or other illegal actions.
