* **Photoshop Elements***. This version of Photoshop is designed for those who want a simpler experience than the full-featured Photoshop but are interested in editing an image. One thing to note about Photoshop is that it's not really a photo editor. Although that's probably not the exact definition of a photo editor, it's something that you or your technical reviewer may want to keep in mind when considering whether Photoshop is a good fit for your project. It's a graphic design program. If your technical reviewer is familiar with Adobe's other products, he or she will know where Photoshop fits into the Adobe portfolio. But if that reviewer does not have a background in graphic design, you should explain the differences to them.

The invention relates generally to the field of containers for storing objects such as weapons. Containers for storing objects of this type are typically arranged to accommodate the different configurations of weapons or other objects in a relatively inexpensive manner. In particular, such containers are often designed to enable the objects to be readily loaded or unloaded. For example, the objects may be loaded into the containers via a door provided at the rear of the container (or other loading means), and objects may be removed through an opposing door provided at the front of the container. In the past, containers of this type have sometimes required a substantial amount of time and effort to assemble or to disassemble. For example, U.S. Pat. Nos. 5,593,230 and 5,658,411 disclose containers that require complicated steps for assembling or disassembling the objects to be stored within the containers. Another problem with known containers relates to the structure used to accommodate the different positions of weapons in the container. Most conventional containers are formed with continuous walls that are integral with the container itself. Accordingly, the position of the object within the container is fixed. When the container includes a pivoting door that can swing open in order to load or unload the objects, the door tends to close around the objects after the objects are loaded or unloaded. This can be problematic if the door is formed integrally with the container. As such, the door is typically fitted with a spring mechanism that prevents the door from fully closing once it is open. Even when a spring mechanism is employed, however, the locking mechanism may not be reliable, especially if the object is rough, or the door is repeatedly opened and closed. U.S. Pat. No. 6,921,460 discloses a container for storing objects, in which the objects can be disposed at a front and rear position within the container. This enables the container to be used to store objects with various shapes. However, in order to accomplish this, a specially shaped container is required. This, in turn, increases the manufacturing cost of the container, and reduces the reliability and ease of use of the container. The invention provides a container for storing objects. The container includes an outer body structure defining a generally rectangular outer housing. A pivoting door extends from a rear portion of the outer body structure, and includes a cavity for receiving an object. The door is adjustable between a closed position in which the door substantially encloses the cavity and an open position in which the door is pivotally

About The Book About The Author Living Out Loud Each year, thousands of people from around the world celebrate the December holiday season by throwing parties, visiting with family, and spending time with friends. But for many, especially those living with a disability, it can be anything but joyous. The disability community has long held its own traditions to celebrate the holidays. To help shed light on this subject, I decided to begin documenting the history of the disability community's holiday celebrations. What I found in the research was a lot of hard work, perseverance, and a lot of dedication on the part of members of the community to ensure that the holidays were not just about going to family and friends' houses, but also that they were about making the community whole. These stories are many and varied, but each story tells the moving, funny, and sometimes poignant tale of a community determined to celebrate the holidays the way they choose to. Each picture is unique in its own way, and each person has their own reasons why they hold an event, and why they decide to host their own.
