"I'm not trying to make a film, I don't want to be David Lynch. I want to make something that can't be ignored, that can't be looked at with the eyes. I want to make a work that touches something deep, deep inside people." -Stefan Heine Just, Bearly is a darkly captivating documentary about a young filmmaker's decline into madness. For over a decade, director Stefan Heine traveled Europe, capturing over 300 hours of intimate footage of people in modern day society. With his camera, Heine examines the people that live around us, highlighting their beauty and flaws. By squeezing out the blood and luster, he aims to expose the human being as they really are. Lacking any ambition or training, Heine's aim is to produce a film that it impossible to ignore. Not only does he film people for hours upon hours, he also interviews them in hopes of discovering some sort of link with their past. But, what he doesn't know is that some of the people he interviews will not only recall memories that go as far back as their childhood, but their memories are real and very traumatic. Heine will be forced to open up his world to these lost memories, and will discover his own vulnerability in the process. What's new in OST And Art Pack - Just, Bearly:

FinishedThe Monster Manual can be downloaded here. The BESPOKE VERSION of any of these characters WILL NOT BE RELEASED BEFORE JUNE 30, 2017. Please address all emails and concerns to me via telegram and tag accordingly, as I may be tagged as @TOSmonster Lamar, I love your art style. It is so distinctive and stands out among the many different sub-genres of D&D presented to the RPG community. What's your inspiration for your work? Lamar - sorry no answers this week, man I am swamped with this year end stuff. In my next post I will be revealing some things about the monsters. Holgarc: Thanks for the mention, and I really appreciate the kind words about the art style! Artists have been asked quite a bit about it, as it's quite distinctive. Some folks compare it to what I see on screen, but the style I use is much simpler than that. For instance, if I wanted one of my Vampyre or Queen Ysanna characters to look perfectly heroic, that part would be covered up, as I feel those two animalistic types are unredeemable heros, and cover ups are a matter of keeping them recognizable as such. I like that. It's easy to tell the character you're watching is Vampyre or Queen Ysanna, despite the fact the painting is simple. As for the inspiration, I don't draw anything except for human beings and animals so I tend to steal from personal viewpoints. I do try to avoid being too sneaky, so I've resorted to copying from other artists who draw only the supernatural. Thal'mana: My wife and I really enjoyed that and will watch it when it airs in our neck of the woods. That is super cool. Thal'mana - would you say that the Queen Ysanna is a delicacy or a family meal type of character? Lamar - Im sorry, I am running out of replies. Fellybe: The Art Pack pack will be out there soon, for your to download. And that same Art Pack will also be available for purchase. Follow the links to other sections. And damn! Just realized this is my third reply for Lame's art pack... Aww, I missed out! I will look out for the art pack :) Lamar - No worries! I am only the designated hamster-me.
