Explore the worlds of amazing PC games with our free games collection!.Q: django: How to debug 500 errors? I had a django app, which starts working fine until i migrate to other development

server. I have a view where i save some data and return a json response with a message, now in my new development server i get a 500 error. My view is like:

```
def save_service(request): ... response =
HttpResponse(content_type="application/
json") json_data = {"message":'some
message'} response['Content-Type'] =
'application/json' json.dump(json_data,
response) return response and this is my
settings.py: INSTALLED_APPS = (
    'django.contrib.admin',
    'django.contrib.auth',
    'django.contrib.contenttypes',
    'django.contrib.sessions',
