The new program is a big improvement over the previous version and it's available in both the Mac and Windows versions. The previous version was a Mac only program. With the new interface, a lot of the information now resides in the Sidebar. With the new Sidebar, there is a lot of room for adding panels to the sidebar and you can now click on a panel to quickly jump to an individual window or merge some of them. You can also remove hierarchies from folders, hide the program windows, reveal the hidden files and folders above, and the options window is also instantly accessible. The new version of Photo Mechanic is more user friendly than ever before. All the basic functions are the same as the previous version but, like the new version of Lightroom, it looks much cleaner in terms of the layout and the icons. Adobe is one of those companies that comes around every few years and blows everybody away with the level of technology in its flagship program. It is, in fact, a company that really doesn't take it easy—it is always pushing the envelope as it brings the latest and greatest to its users. Part of the excitement of Adobe Photoshop is the fact that people's expectations always go up with every product update. This fact was most evident when Photoshop CS6 was released just a few years ago. I was one of those people that really believed that year would be the year that compositing and 3D rendering came in to Photoshop. I was also a huge fan of the Adobe After Effects and Premiere Pro programs. I thought it would be the year that bridging those two programs would be a reality.

Many users complain that Photoshop has lost its way. All of the strengths that made Adobe such a powerful platform are gone, and the company is going in the wrong direction. However, as long as they're around to tickle us all with new features, we're willing to overlook the nagging bugs. When asked why all of her favorite photos reside on the iPhone, a professional photographer named Emad Hamad said, "They are nice to look at on the phone. You can take them with you and put them in print, and instantly order prints." He went on to say that professional photographers like to be able to have "the latest technology at their fingertips." But unfortunately, iPhone photography is not secure. Users can't email their images directly from the phone, so they rely on Google Photos instead. Google Photos is completely free; however, the user is constrained to a 350 GB storage limit. If a user doesn't delete a photo from Google Photos, it would count against their storage cap. This is where Ephrata's Jan Weiting really shines when it comes to remote access and storing specialized information. This photo, "Polyphonic keyboard", was sent to Jan over a data connection. The size of this photo is a size of 4.76 MB, but when it's displayed through Jan's software, it's considerably larger. Google Maps has an incredibly useful feature. You can copy and paste the map address anywhere, and the application will find the address on the map. You

can also add photos to a street address and turn the address into a clickable web link, complete with zoom controls.

There are plenty of brand-spanking new updates on Photoshop for the year ahead including **Automatic Duping**, a new way to crop images from their background and canvas tools, as well as the introduction of the all-new **Dodge Object** tool. In essence, this feature allows you to obscure certain parts of an image. Adding together the features from the two above creative suites, Adobe Photoshop Elements can give you the power of Photoshop and the simplicity of Illustrator all in one tool. In fact, the latest Photoshop Elements 2020 may have more features and options than all the other photo-editing software on the market.
